

ADD THE WALLY

MANUAL

fatboy®

Fatboy® product information Add the wally

The RockCoco is an in-/outdoor chandelier with transparent plastic shades, which can be dimmed steplessly using the remote control included. The lamp contains 12 single fixed LED modules. The lamp is suitable for 100 to 240 VAC power supplies (50/60Hz).

WARNING: READ CAREFULLY BEFORE USE!

- Only use the AC adapter enclosed!
- Using a different power adapter may cause irreparable damage to the luminaire.
- Place the luminaire on a dry, horizontal surface.
- Do not expose the luminaire to excessive heat from heat sources.
- Check the voltage of your power supply. The voltage must be between 100 and 240 VAC. Inspect the cable on the provided adapter for damage.
- This is not a toy, keep away from children.

Battery

The Add the wally contains a battery which cannot be replaced or disassembled. It must be recycled or scrapped separately from household waste.

Instruction for use and maintenance

First time use:

Before packing the luminaire is put in sleeping mode to save energy during transportation and it is required to activate it, by inserting the USB Type-C plug into the slot at the bottom of the luminaire and to connect the adapter into a power socket, after unpacking. The luminaire is activated in a few seconds and will fully function now. We recommend charging the battery for at least 8 hours, when first time use.

General use:

When removing from or hanging back on the wall, do not use force as it could damage the back of the lamp.
Charging the luminaire. Insert the USB Type-C plug into the slot on the bottom of the luminaire.
Connect the adapter into the wall socket. It will take approximately 3 hours to fully charge the luminaire.

There is an indicator light located next to the USB Type-C slot. While the battery is charging the light will flash. When the battery is fully charged it will remain lit.

The luminaire can be controlled by touching the metal part of the luminaire.

To adjust the brightness:

- Starting position: the luminaire is switched off.
- Touch the base once: the light will turn on at 33% brightness.
- Touching it a second time: 66% brightness.
- Touching it a third time: full brightness.
- And at the fourth time the light will turn off.

When the luminaire stops lighting, it needs to be charged.

Charging the luminaire should always be done indoors.

Maintenance

If you don't use the lamp for a longer period of time please make sure you recharge it at least every three months to keep the battery in good condition.

Cleaning

Clean carefully with soft cloth and lukewarm water (if necessary with soft soap). Do not use any cleaning materials that contain chemicals. Never open the luminaire whilst cleaning it.

Trouble shooting

The lamp has fallen and the shade has come loose:

- Replace the shade on the lamp. If you hear a 'click' sound, the shade has been mounted correctly.

The luminaire is not working:

- Check the connection with the adapter and make sure the lamp is charging. The charger works when the luminaire can be turned on during charging.
- When the luminaire doesn't charge anymore, please contact your fatboy dealer. Never try to replace the battery yourself.
- Do not use the luminaire if the USB cable is damaged.

IMPORTANT!

Please contact your Fatboy® dealer if you have any other problems.

Technical specifications

Model: Add the wally

Primary rating (adapter): 100-240 V AC, 50/60 Hz

Secondary rating (charging): 5 VDC, 1 A

Safety Class: Class III

Connection: USB Type-C

Light source: 1 x Cree Xlamp MX-6 LED (1W)

Switch: built-in touch switch/dimmer (3 dimmer positions)

IP value: 21 (protected from dripping water)

Ambient temperature: -10 to 40 °C

Materials: Polypropylene (shade), ABS (hanging part), Metal (frame)

Internal battery: Li-PO 1600 mA, 3.7 V

Dimensions: 14 cm (diameter), 22 cm (height)

Total weight: 0.46 kg

This luminaire contains a LED light source, which cannot be replaced by the end user and shall only be replaced by the manufacturer or his service agent. When the light source reaches its end of life, the whole luminaire needs to be replaced. The adapter included is intended for charging the battery inside the luminaire.
